* Fiber Visualizer

Field Optical Testing Redefined!

MT9090A with MU909014/15 Overview

There are many handheld OTDRs on the market that appear to be a good value until they are put into action and the user quickly finds out that they lack the performance needed to install and maintain today's networks.

The new MU909014/15 µOTDR Module series for the MT9090A Network Master™ platform from Anritsu finally addresses this need by providing all of the features and performance required for installation and maintenance of optical fibers in a compact, modular test set. The MT9090A represents an unmatched level of value and ease of use, while not compromising performance. Data sampling of 2 centimeters, dead zones of 0.8-meter and dynamic range up to 38 dB ensure accurate and complete fiber evaluation of any network type – premise to access, metro to core...including PON-based FTTx networks featuring up to a 1 x 64 split.

The MT9090A with MU909014/15 module represents a new era in optical fiber testing!

Key Features

- Tri-wavelength OTDR for both installation and maintenance (1310 nm/1550 nm plus filtered 1650 nm or 1625 nm)
- Built-in PON Power Meter, Loss Test Set and Light Source functions
- High-end OTDR performance in a pocket-size package with unique battery operation
- "Fiber Visualizer" mode simplifies operation, no OTDR knowledge needed
- Complete PON testing through splitters up to 1 x 64
- Bluetooth, WLAN and Ethernet connectivity*
- *: These features use an USB Ethernet converter, USB WLAN dongle, or USB Bluetooth dongle.

The Bluetooth® wordmark and logos are owned by the Bluetooth SIG, Inc. and any use of such marks by Anritsu is under license.

MU909014/15 μOTDR ModuleTM

1310 nm/1490 nm/1550 nm for Installation. 1625 nm & 1650 nm for Maintenance. 1310 nm/1550 nm plus 1625 nm or 1650 nm

Network Master™ and µOTDR Module™ are a trademark of Anritsu Corporation.

A Truly Revolutionary OTDR!

Introducing the first handheld OTDR that does not compromise performance – the new µOTDR from Anritsu. With performance that rivals traditional OTDRs that are four times the size and more than double the price, the Network Master MT9090A µOTDR has created a new class of test instruments. It features 2 cm resolution for accurate mapping of events, dead zones of 0.8-meter (2.6-feet) and a dynamic range of up to 38 dB - enough to test over 150 km (90+ miles). The MT9090A µOTDR also takes portability to a new level by being the first handheld OTDR that truly fits in the palm of your hand.

Complete Testing Tool - Premise to Core

With a dynamic range of up to 38 dB, the µOTDR evolves far beyond the premise/access applications that other handheld OTDRs service. Metro links can be tested with lower pulsewidths which provides greater detail and better resolution while long haul fibers up to 175 km (108 miles) can also be completely evaluated.

FTTx and PON Ready

With splitter-based fiber-to-the-x (FTTx) deployments becoming more popular, the need for test equipment to thoroughly test and maintain them has risen. The µOTDR series features the ability to test up to a 1 x 64 split completely from end-to-end and with high resolution.

Easy Operation and Analysis

"Fiber Visualizer (FV)" is a new fault location function designed to simplify the entire testing process. Fiber Visualizer automatically selects the testing parameters to ensure the correct setup and provides a simple, graphical summary of the fiber under test within seconds. A comprehensive PDF report can then be customized and generated, completing the testing process.

0.8-m Dead Zone for Short Fiber Analysis

With 0.8-meter dead zones, the MT9090A is perfect for evaluating central office. FTTx and intra building cables.

Fast Real Time Sweeping

The MT9090A µOTDR features real-time updates as quickly as 0.25 seconds. This is useful for connector and splice optimizations as well as verifications of parameter selection.

Portable

The MT9090A µOTDR takes portability to a whole new level. With dimensions of just 19 cm \times 9.6 cm \times 4.8 cm (7.5" \times 3.8" \times 1.9") and a weight of only 700 g (1.54 lbs.), the µOTDR is the smallest and lightest OTDR on the market. With its lightweight design and user friendly dimensions, the MT9090A is perfect for the outside plant environment and can easily be managed with one hand. The standard soft case with shoulder strap further increases portability when traveling from the truck to the testing site.

Bluetooth, WLAN and Ethernet Connectivity

The Bluetooth feature enables you to share files between the µOTDR series and a PC. The WLAN and Ethernet features enable you to share files as well as use the remote GUI feature. You can connect the µOTDR and PC, and control the µOTDR series from a browser.

Bluetooth:

- Share file folder

WI AN and Ethernet:

- Share file folder - Remote GUI

4.3-inch Wide Screen Display for Easy Viewing

The high resolution, full color, 4.3-inch wide screen display is the perfect format for viewing OTDR results. It also provides excellent readability both indoors and outdoors.

Integrated Launch Fiber

To further simplify testing, the MU909014/15 series is the only handheld OTDR that features an integrated launch cable. A ten meter (30 feet) fiber is built-in so initial fiber connections can be verified without the need for additional patchcords or launch fibers.

Reliable. Capable.

When buying products, you tend to choose ones that are innovative and from established companies. When you need to install and maintain optical networks, this should also apply. With over 50 years of combined OTDR design, Anritsu, which now includes NetTest, delivers the features that matter. Having been in the test and measurement business for a long time, we understand the importance of performance, portability, reliability, easy operation and of course price.

Event Table with User Defined Thresholds

PASS/FAIL thresholds for key acceptance criteria such as splice loss, reflectance and total span loss can be set in the MT9090A allowing technicians to easily assess a fiber's condition. Failing values are clearly highlighted in the event table alerting technicians of potential problems.

Unique Battery Operation

Since AC power is not always available where you need it, especially at fiber pedestals, the MT9090A typically provides 8 hours of testing on a single charge. This coupled with an optional car cigarette lighter cord guarantees the MT9090A is ready when you are. µOTDR supports widely available NiMH and Alkaline batteries for truly unique battery operation.

Quick Startup

The MT9090A is ready for measurement in under 15 seconds so productive work can start immediately.

Video Inspection Probe Support

When equipped with the optional connector video inspection probe (G0306C*), the µOTDR becomes a powerful tool for evaluating connector cleanliness and quality. The G0306C can reduce issues by verifying the condition and cleanliness of connector end faces during the installation phase.

The G0306C has added a Pass/Fail analysis function to the conventional VIP.

This new function inspects the state of the connector end using video. It can automatically inspect the end of the optical connector for defects and scratches (The automatic pass/fail determination is made in accordance with the IEC61300-3-35 standard.) You can also create a PDF report on the µOTDR series.

Screen Capture Function

Screen shots are sometimes useful for adding to reports so the MT9090A features the ability to save screen shots as Bitmap images.

Functions for FTTx

One µOTDR module supports FTTx installation and maintenance (PON Power Meter, Loss Test Set, Light Source) in addition to μOTDR functions. (See page 6 for details.)

*: When checking the end face of some SC-APC-F and FC-APC-F adapters, sometimes, there may be a dark region at the screen edge and the end face may not be checked correctly.

*1: There are installation restrictions, depending on the model.

*2: The number of ports is different, depending on the model.

Installation and Maintenance Simplified

Since the MT9090A is designed for technicians of any level, its hardware and user interface are optimized for simplicity. A customizable testing sequence and "Full Auto" mode automates testing and guides novice users. Specialized maintenance wavelengths are also available to eliminate equipment damage and transmission interruptions.

Installation Simplified

The MU909014/15 µOTDR Module series provides easy and accurate verification of fiber installations at 1310 nm, 1490 nm and 1550 nm to ensure your network is ready for any transmission type. The user simply connects the fiber, selects "Full Auto" and presses "Start" - all settings are automatically selected to ensure accurate and constant results for any skill level. Upon completion, all key fiber characteristics are displayed within seconds. Experienced users can also "fine tune" all testing parameters and make manual measurements.

Step 1 - Connect fiber and Power on Step 2 - Select "Full Auto" and Press "Start"

All testing parameters are automatically selected.

^{*:} The screen items depend on the selected module.

Step 3 - Read Results

Test results including all splices and connectors, as well as total fiber length and loss are shown in an easy to read table.

0 I	e Analysis		1	0:50:48 (III) 7.0286 km	Test Setup
Total Events Found End/Fault Distance			3 7.0286	km	Analysis Setup
	Total Fiber Loss Cable Loss		23.49 dB 3.34 dB/km		Thresholds
No.	Distance (km)	Туре	Loss (dB)	Refl. (dB)	Setup
1	6.4106	-011	12.97	-55.8	
2	6.9157	- 0≣	8.32	-48.5	Trace
3	7.0286		END	-16.2	View

Step 4 - View Trace

View trace if desired to see the complete fiber trace and make any manual measurements.

Maintenance Simplified

Being able to test active fibers is a key requirement for network maintenance since multiple users often share portions of the network and taking them all out of service is not an option. To address this need, special modules are available in the MT9090A μOTDR series. 1650 nm is recommended by the ITU-T L.41 for active maintenance since it features 100 nm of isolation from the nearest 1550 nm transmission wavelength. The 1650 nm OTDR also features an integrated filter to block transmissions from damaging the OTDR. 1625 nm is also available and can be used for in-service testing or as an "extra" test to verify installation for stresses such as macrobends.

Added Macro Bending analysis function:

The µOTDR series finds macro bending points by comparing data from two traces: one 1310 nm and the other 1550 nm.

Network Documentation Simplified

Simple Data Storage

With internal data storage plus support for external USB memory devices, the MT9090A is more than capable. Add to this auto file saving and naming for easy, error-free documenting of your network.

Common OTDR Data Format

The MT9090A supports the universal Telcordia SR-4731 format making it compatible with not only legacy Anritsu and NetTest products, but with many other vendors data.

Free and Simple Software Upgrades

Firmware upgrades are easily performed via USB and available from the Anritsu website for registered users or through Anritsu customer support.

All-in-one FTTx Installation and Maintenance Functions

There are three types of µOTDR module: single wavelength (1625 nm or 1650 nm) for the FTTx maintenance market including Metro networks, dual wavelength (1310 nm/1550 nm) for the installation market, and triple wavelength for both these markets.

These all-in-one µOTDR modules support every function required at fiber installation and maintenance, as well as OTDR functions. The PON Power Meter and Power Meter are ideal for loss measurements required for quality measurements and basic fault tests

PON Power Meter (1490 nm/1550 nm)

Generally, PON communications use three wavelengths: 1310 nm, 1490 nm, and 1550 nm. Data (1490 nm) and video (1550 nm) signals are sent to subscribers through one optical fiber but a generalpurpose optical power meter cannot separate the two wavelengths. making it difficult to locate faults using optical level measurements. The PON Power Meter can identify and measure the two 1490 nm and 1550 nm signals to support PASS/FAIL evaluations based on a set threshold and reference value. Additionally, power measurements and µOTDR tests are quick and easy without changing the optical fiber because the PON Power Meter port is shared with the µOTDR function.

Light Source/Power Meter

The µOTDR module can be used as a light source to identify an optical fiber and measure the loss by connecting an optical fiber identifier and optical power meter at the other end of the fiber. Since all wavelengths are shared by one µOTDR port, the fiber identification, loss, and µOTDR measurements can all be performed as a single task without changing the fiber connection. Both modulation (270 Hz, 1 kHz, 2 kHz) and CW signals are supported. The simple power meter function is ideal for checking optical levels to confirm a fault occurrence using total received power. Setting a threshold and reference value makes PASS/FAIL evaluation easy too. In addition, power measurements and µOTDR tests are quick and easy without changing the optical fiber, because the Power Meter port is shared with the µOTDR.

Loss Test Set

Combining the µOTDR module light source with the Power Meter supports use as a Loss Test Set.

The loss at both 1310 nm and 1550 nm can be measured with one uOTDR by looping-back the optical fiber. And both modulation (270 Hz. 1 kHz, 2 kHz) and CW signals are supported. Just setting the threshold and reference value makes PASS/FAIL evaluation easy.

DCFL Function

The Drop Cable Fault Locate (DCFL) mode is a useful function to investigate faults occurring in a drop cable. It consists of the Power Meter function and OTDR function, so you are not required to switch measuring instruments or applications.

*: DCFL mode depend on the selected module

Visible Laser Diode

The optional visible red LD light source makes it easy to spot faults in splices and connectors and well as to manage fibers.

- *: The PON Power Meter, Light Source, Power Meter, Loss Test Set, and Visible Laser Diode functions have different menus, depending on the selected module. See the Ordering Information for details.
- *: The Visible Laser Diode is operated from the µOTDR and Power Meter menus.
- *: The screen items depend on the selected module.

MU909015A6 µOTDR Module

Model Name		MU909015A6-053	MU909015A6-054
		MU909015A6-063	MU909015A6-064
Center Wavelength*5		1625 ±15 nm	1650 ±15 nm
Dynamic Range*7, *8	PW = 20 μs	35 dB	*9, *10
Dynamic Range ", "	PW = 500 ns	25 dB*9, *10	24 dB*9, *10
Dead Zone*12		Fresnel: ≤0.8 m (Typical)	
(IOR = 1.500000)		Backscatter: ≤4.5 m (Typical)	
Number of Sampling F	oints*13	<250,001 pts (Course: <7,501 pts, Medium: <20,001 pts, Fine: <250,001 pts)	
Sampling Resolution		2 cm (min.)	
Tasting Mades		OTDR (Full automatic, Manual, Real time), Power Meter, [Video Inspection Probe (Option)]	
Testing Modes		[PON Power Meter, Light Source]	
Power Meter		Please refer to the spec "Power Meter"	
PON Power Meter		Please refer to the spec "PON Power Meter"	
Light Source		Please refer to the spec "Light Source"	
		Operating temperature and humidity: -10°C to +50°C, <95% (no condensation)	
Environment		Storage temperature and humidity: -30°C to +70°C, <95% (no condensation)	
		Vibration: MIL-T-28800E Class 3, Ingress Protection Rating: IEC60529 IP51	
Laser Safety*14		IEC 60825-1: 2014 CLASS 1	
		Complies with 21CFR1040.10 and 1040.11 except for conformar	ce with IEC 60825-1 Ed.3., as described in Laser Notice No.
		56, dated May 8, 2014	

- *1: Design assurance. Distance range: 25 km, Pulse width: 2 µs, 20 km open the fiber-end. BSC: -78.5 (1310 nm), -80.1(1490 nm), -81.5 (1550 nm), -82.5 (1625 nm/1650 nm)

- -82.5 (1625 nm/1650 nm)

 *2: All specifications are guaranteed by standard battery.

 *3: Back light low, Sweeping halted, +25°C

 *4: +10 to +30°C, Power off

 *5: At +25°C, 1 μs, except charging battery

 *6: Typical value, ±25 nm is Guaranteed

 *7: Typical value, Distance range: 125 km, Averaging: 180 sec, SNR = 1, +25°C, Except while charging battery, Subtract 1 dB for guarantee

 *8: Dynamic range (one-way back-scattered light)

 SNR = 1: The level difference between the RMS nose level and the level where near end back-scattering occurs.
- - where near end back-scattering occurs.

- *9: 1490 nm/1550 nm cut filter included (1625 nm or 1650 nm port)
- *10: Specified without background light (1625 nm, 1650 nm)

- *11: In service Signal is -20 dBm (CW) at 1310 nm/1550 nm

*12: Return Loss 45 dB, +25°C Fresnel: PW = 5 ns, 1.5 dB down from the peak of Fresnel Backscatter: PW = 5 ns, Deviation ±0.5 dB

- *13: Either medium and fine density value is selected depends on distance range
- *14: Safety measures for laser products

The following descriptive labels are affixed to the product.

This product Complies with 21 CFR 1040. 10 and 1040. 11 except for conformance with IEC60825-1 Ed.3., as described in Laser Notice No.56 dated May 8, 2019.

Other Functions

Light Source

Measurement port	1310 nm/1490 nm/1550 nm OTDR port (Options 059 and 069)
ineasurement port	Power Meter: Shared with OTDR port
	1625 nm or 1650 nm OTDR port (Except options 059 and 069)
	Dedicated port (Options 059 and 069)
	Light Source
Wavelength	1310 ±25 nm, 1550 ±25 nm (Except options 059 and 069)
vvavelerigiri	1310 ±25 nm, 1490 ±25 nm, 1550 ±25 nm (Options 059 and 069)
Output Power*15, *16	−5 ±1.5 dBm (CW, 25°C)
Output stability*17	≤0.2 dB
Modes of Operation	CW, 270 Hz, 1 kHz, 2 kHz
Laser Safety	Same as OTDR
	Power Meter
Setting Wavelength	1310/1490/1550/1625/1650 nm
M*40	-50 to +26 dBm (CW)
Measurement range*18	-40 to +13 dBm (270 Hz, 1 kHz, 2 kHz)
Measurement Accuracy*19	±0.5 dB
Modes of Operation	CW, 270 Hz, 1 kHz, 2 kHz

- *15: At +25°C, CW
- *15: At +25°C, CW

 *16: Fiber length 2 m, after the warm-up.

 *17: Wavelength 1310 nm/1550 nm, CW, ±1°C at one point within -10°C to +50°C, deference between the largest value and shortest value for one minute, single mode fiber 2 m, when the optical power meter with return loss of 40 dB or more is used. After the warm-up time (10 minutes) passed.

 *18: At 1550 nm

 *19: 1310 nm/1490 nm/1550 nm, CW, -20 dBm, 25°C, Using Anritsu's reference single mode fiber with FC/UPC connector, after zero offset execution.

 *20: 1490 nm/1550 nm, CW, -20 dBm, +25°C, Using Anritsu's reference single mode fiber with FC/UPC connector, after zero offset execution.

 *21: Design assurance.

Ordering Information

Please specify the model/order number, name and quantity when ordering.

The names listed in the chart below are Order Names. The actual name of the item may differ from the Order Name.

1) Select Mainframe

Includes battery pack, AC charger/adapter, standard soft case, strap and protector.

Model/Order No.	Description
	Mainframe
MT9090A	Mainframe
Mainframe Option (Remember to specify)	
MT9090A-001	Dedicated for µOTDR Module

- *1: When ordering MT9090A and MT9090A-001, two matching G0202A battery packs are supplied as standard accessories.
- *2: This can be used as a neck strap to support waist-level operation.

Model/Order No. Description		
	Standard Accessories for MT9090A	
G0202A*1	Replacement NiMH Battery Pack	
G0203A	Replacement AC Charger/Adapter	
B0601B	For MT9090A with/without Protector. This soft case is a	
D0001B	standard accessory for the MT9090A main frame.	
Z1023A	Replacement Strap	
B0663A*2	Protector	
Standard Accessories for MT9090A-001		
G0202A*1	Replacement NiMH Battery Pack	

2) Select Base Module

Model/Order No.	Description
MU909014A1*3	μOTDR (Single wavelength, 30 dB class OTDR with VLD)
MU909015A6*4	μOTDR (Single wavelength, 35 dB class OTDR with PM,
	PON-PM and LS)
MU909014B*3	μOTDR (2-wavelength, 30 dB class OTDR)
MU909014B1*3	μOTDR (2-wavelength, 30 dB class OTDR with VLD)
MU909015B*3	μOTDR (2-wavelength, 35 dB class OTDR)
MU909015B1*3	μOTDR (2-wavelength, 35 dB class OTDR with VLD)

Model/Order No.	Description
MU909014C*6	μOTDR (3-wavelength, 30 dB class OTDR)
MU909014C6*6	μOTDR (3-wavelength, 30 dB class OTDR with PM,
	PON-PM, LTS and LS)
MU909015C*5, *6	μOTDR (3-wavelength, 35 dB class OTDR)
MU909015C6*6, *7	μOTDR (3-wavelength, 35 dB class OTDR with PM,
	PON-PM, LTS and LS)

- *3: One OTDR port (any of 1310 nm/1550 nm, 1625 nm, 1650 nm) and visible light source (option) (Fig. 1)
- *4: One OTDR port (1625 nm or 1650 nm) (Fig. 2)
- *5: One OTDR port (1310 nm/1490 nm/1550 nm; Options 059 and 069) (Fig. 2)
- *6: Two OTDR ports (1310 nm/1550 nm, and 1625 nm or 1650 nm; Except options 059 and 069) (Fig. 3)
- *7: One OTDR port and dedicated power meter port (1310 nm/1490 nm/1550 nm, and power meter; Options 059 and 069) (Fig. 3)

Fig. 3

3) Select Module, Connector Interface and Testing Options

Includes operation manual and quick reference guide.

- *8: PM (Power Meter) function shared with OTDR port.
- *9: Dedicated PM port.
- *10: PON-PM (PON Power Meter) shared with 1625 nm or 1650 nm OTDR port. Identifies and measures 1490 nm and 1550 nm wavelengths.
- *11: Dedicated PON-PM port. Identifies and measures 1490 nm and 1550 nm wavelengths.
- *12: LTS (Loss Test Set) function for measuring 1310/1550 nm wavelengths. Light source shared with 1310/1550 nm OTDR port. Power meter shared with 1625 nm or 1650 nm OTDR port.
- *13: LTS function for measuring 1310/1490/1550 nm wavelengths. Light source shared with 1310/1490/1550 nm OTDR port. Power meter is dedicated port.
- *14: LS (Stabilized Light Source) shared with OTDR port for each wavelength.
- *15: VLD (Visible Laser Diode) function with visible light source port operated from OTDR or Power Meter.

	Phosphor bronze
J1603A	Replaceable optical connector (FC)
	Phosphor bronze

B0601B Standard Soft Case

This standard accessory accommodates the mainframe with fitted protector.

B0602B Deluxe Soft Case

Full Network Master operation without removal from the case.

Provides excellent protection for use in hash conditions.

This does not accommodate the mainframe if the protector is fitted.

B0600B Hard Case

This accommodates two mainframes (with or without fitted protector), accessories (light source or power meter, backup battery, fiber cleaner, etc.).

B0663A Protector

The mainframe with fitted protector.

Network Master Pro MT1000A Metwork Master In

OTDR Module 1310/1550 nm SMF MU100020A OTDR Module 1310/1550/850/1300 nm SMF/MMF MU100021A OTDR Module 1310/1550/1625 nm SMF MU100022A OTDR Module 1310/1550/1650 nm SMF MU100023A

Installing an OTDR Module MU100020A/MU100021A/MU100022A/MU100023A provides the OTDR functions required for optical fiber I&M. Work efficiency is increased by all-in-one support for optical fiber tests and data communications network commissioning.

I&M tests of 1.5 Mbps to 100 Gbps communications networks can be executed by simultaneously installing the MU100010A or MU100011A. In addition to supporting Ethernet, OTN, etc., networks, Mobile base station CPRI and OBSAI, as well as SyncE protocols are also supported.

10G Multirate Module 100G Multirate Module MU100010A MU100011A

Installing the MU100010A or MU100011A in the MT1000A supports commissioning and maintenance tests of communications networks operating at speeds from 1.5 Mbps to 100 Gbps.

In addition to Ethernet, OTN, eCPRI/RoE/CPRI/OBSAI, Fibre Channel and SyncE protocols used by mobile-network base stations are supported too.

Network Master Pro MT1040A Metwork Master

The Network Master Pro MT1040A for 400G networks is a portable tester for evaluating the communications quality of various network types operating at speeds from 10 Mbps to 400 Gbps.

The stackable module configuration facilitates dual-port 400G Ethernet measurements using two installed 400G measurement modules.

- OTDR configuration by re-arranging stackable module configuration
- Efficient on-site automated testing and remote control

Gigabit Ethernet Module

MU909060A

Dedicated field test solution for installation and troubleshooting Ethernet links in access networks.

Light Source/Optical Power Meter CMA5 Series

For optical fiber installation and maintenance.

ACCESS Master MT9085 Series

For WAN/MFH/DCI/FTTH Optical Fiber I&M

- Improved operability with powerful synergy of 8-inch touchscreen and hardware keys
- At-a-glance Pass/Fail evaluation using Fiber Visualizer
- All OTDR, OLTS, and Visible Light Source operations on one screen
- Short event dead zone of ≤0.8 m and high dynamic range of 46 dB max.
- Power meter option for measuring optical power up to +30 dBm
